CHAPTER XLVI.

SCHOOLS FOR THE DEFECTIVE CLASSES.

Schools for the blind.—It is gratifying to note in most of the institutions for the education of the blind in this country the effort to secure for the blind the means of a broader intellectual foundation, a greater development of the inner forces of thought, feeling, and action, a greater power of self-reliance and self-direction. As now conducted the kindergarten and elementary schools lay a firm foundation for their physical, mental, moral, social, and æsthetic development. This, followed by a high or preparatory school complete in its departments for physical and manual training as well as for literary, scientific, and musical studies, will fully equip them to enter colleges and universities and conservatories of music. There, in company with the seeing pupils, the blind may pursue almost any branch of knowledge, thus enabling them to enter many spheres of usefulness, not confining them to the field of manual labor that is now practically closed to them on account of the extensive employment of machinery.

The total number of schools reported was 36; number of instructors, 393—male 137, and 256 female; in music, 127, and in the industrial departments, 122. The total number of pupils reported was 3,665—male 1,898, female 1,767; in the kindergarten, 417; in vocal music, 1,738; in instrumental music, 1,797. In the industrial department were reported 1,924. The total number of volumes in the libraries was 93,262. The value of scientific instruments was \$100,610 and the value of grounds and buildings \$6,334,307. The total expenditure was \$1,065,437.

Schools for the deaf.—There are represented in this report 104 schools for the deaf, with 1,158 instructors and 10,923 pupils. The 57 State public schools report 1,007 instructors—males 362 and females 645; in articulation, 381; aural development, 31; in industrial department, 280. The total number of pupils, 9,890, of which number 3,623 were taught by the combined system, 3,301 by the purely oral method, and 3,169 by the manual method; 696 were taught in the kindergartens. The number of graduates was 246. The libraries of these institutions contained 95,229 volumes. The value of scientific apparatus was \$14,420; of grounds and buildings, \$11,849,054. The total expenditures amounted to \$1,999,767.

The 18 private schools for the deaf report 72 instructors—43 in articulation, 8 in aural development, and 24 in the industrial department. The number of pupils reported was 439, of which number 256 were taught by the combined system, 141 by the purely oral method, and 37 by the manual method; 47 were taught in the kindergartens. There were 32 graduates.

The public day schools for the deaf reported 79 instructors—57 in articulation, 25 in aural development, and 32 in industrial departments. The number of pupils reported was 594, of which number 110 were taught by the combined system, 324 by the purely oral method, 9 by the manual method. The number taught in the kindergartens was 31. There were 13 graduates.

The first oral school in America for the deaf was established in 1867. It then met with very little favor. Since 1891 the system has grown with wonderful rapidity, and is now followed in all the leading schools of the country. Again the kindergarten supplies the means to the end in oral training. The early formation of the habit of looking to the lips rather than to the hands for information is the first step toward the acquisition of speech. Manual training in schools for the deaf occupies an important place. While it is not trade teaching, it prepares pupils for the selection of a trade; and "as a trained mind is the best preparation for the study of a profession, so are the trained hand and trained eye the best preparation for the successful acquisition of a trade."

The South gives evidence of gratifying progress in deaf-mute education. The schools of Georgia and Texas have grown from log cabins to elegant buildings. The deaf school buildings of Georgia are valued at \$75,000 and those of Texas at \$337,500.

Schools for the feeble-minded.—The number of schools reported was 29, with 281 instructors in the school departments, 236 in industrial departments, and 675 assistants in caring for the inmates. The number of pupils reported was 9,542, of which number 973 were instructed in the kindergarten and 1,559 in music. The 19 State public schools report 233 instructors in school departments, 206 in industrial departments, and 610 assistants caring for the inmates. The number of pupils reported was 9,158. Of these 973 were in kindergartens and 1,559 in music. The value of grounds and buildings was \$5,546,827, and the expenditures were \$1,472,170.
